

Dioxin 2018 Session

Environmentally Persistent Free Radicals

PLEASE SHARE THIS INVITATION
WITH YOUR COLEGUES and STUDENTS!

Dear Colleague,

You are invited to submit an Abstract to the **Dioxin 2018** Symposium Session on **Environmentally Persistent Free Radicals** to be held in Kraków, Poland, 26-31 August 2018. Each registered author can submit as presenter up to two abstracts. Abstracts by students (for oral or poster presentation) can be accepted also for the Pre-Dioxin Students Session to be held on August 25.

We welcome Abstracts that highlight new findings on

- Detection, identification and quantitation of EPFR
- Role of EPFR in environmental fate of chemicals and pollutants
- Mechanisms of formation, stabilisation and decay of EPFR, including theoretical modelling and ab-initio calculations of EPFR stability
- Roles of particulate matter and reactive oxygen species
- Risk assessment and regulatory issues

The oral presentation is to be 20 minutes in length (including questions). Ideally, all submissions are to be a one page abstract or a four page short paper (see the guidelines established by the meeting organizers).

A one page abstract should have up to 600 words. A short paper consists ~4 pages (see the guidelines established by the meeting organizers), and will be published on a USB stick and can be accepted and published in the 2018 volume of the Organohalogen Compounds journal (http://dioxin20xx.org/ohc_database_search.htm).

The Pre-Dioxin 2018 Symposium Students Session “**All POPs and Pseudo-POPs**” will be held at the session venue located very close to the Old Downtown Kraków area. This is a session for students by students and only student presentations are accepted. Depending on the number of participants, one submission per registered student is permitted at this time. In addition to the standard 20-minute oral presentations (including time for questions) and poster presentations, there exists the possibility of presenting a short (5 min) poster highlight session in addition to a poster presentation. These short oral presentations will give young researchers the opportunity to present their work and initial results and will give an opportunity to receive constructive feedback. Awards for the best student presentation (oral or poster) will be granted to students for outstanding presentations at the Students Symposium.

Students applying for a Otto Hutzinger Award must submit a four pages short paper and for students attending the Pre-Symposium Students Sessions only the one-page abstract is required.

Kindly let us know in advance if you plan to submit an Abstract for consideration as an ORAL presentation.

NOTE: Participation in the Students Session is free of charge for student presenters who are registered for the Dioxin 2018 Symposium, and have paid applicable registration fees. Other student attendants – please see for details at www.dioxin2018.org.

Dioxin 2018 Abstract Submission – Deadline for an abstract submission is May 11, 2018.
Your abstract can be considered as accepted unless you receive a notice of rejection.

We look forward to hearing from you -- and hope to see you at Dioxin 2018 in Kraków.
