

A brand-new technology from

## ***Cryogenic Air Sampler for POPs***

***The CAS-03 enable easy and complete collection of both PARTICLE and GAS in atmosphere at the same time !!***

- ✓ **Compliance with ISO methods** – Fit to ISO25101 (PFOS/PFOA) and brand-new ISO method TC147/SC2/WG74 (PFAS LC-MS/MS).
- ✓ **LC-MS analysis ready** – Sample collected as freeze/liquid is ready to inject LC-MS without any SPE/filtration.
- ✓ **Highly portable** – Only 17 kg, Suitcase size and No coolant is necessary but it's suitable for **gas sampling at -20C** with only electric power.
- ✓ **Don't worry about humidity** – Applicable to humid and foggy environment without any dryer.
